Back to the roots

With the G-AD-ATC-10G-2, in an elegant aluminum housing, you can convert your USB-C port into a „normal" USB-A port USB 3.2. With this Graugear adapter, nothing stands in the way of, for example, operating an external storage device with a USB-A port on a device with only Type-C® ports. The adapter can be used on notebooks, PCs, as well as mobile devices. With the appropriate hardware to be connected externally, nothing stands in the way of a fast data transfer of up to 10 Gbit/s.

Specification
